

ListBox Neo

Playlist Preparation

ListBox Neo is an offline Programme schedule creation and playlist editor. The perfect tool for schedule creation and editing with clip trimmer for simple programme editing.

Sophisticated editing facilities

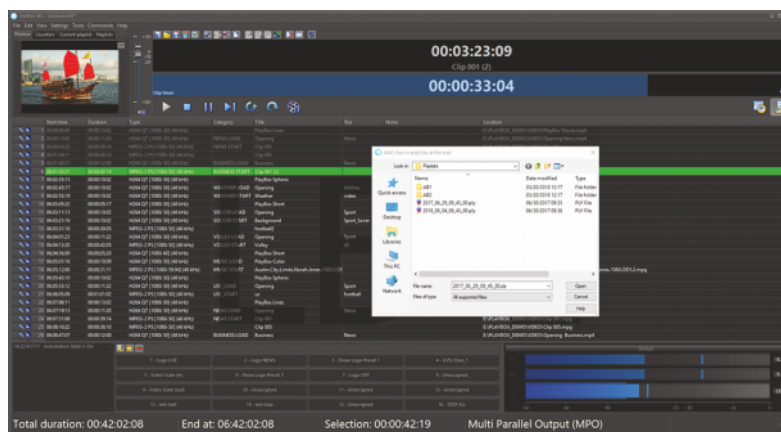

ListBox Neo provides all necessary editing facilities for convenient playlist creation. You will find all expected features such as searching, cut/copy/paste, multi-selection editing, ordering facilities, playlist printing, and last but not least - multi-level undo/redo.

Last-minute clip editing

Simple clip editing tools are provided within the integrated clip trimmer. It allows discarding unnecessary footage, clip splitting and last-minute order reversal within the same clip. Forget about returning the clip back to the editing suite - no need and no time! You can even edit the on-air playlist, AirBox Neo will automatically reload the new playlist on the next event.

Traffic system integration

ListBox Neo imports traffic logs from third-party scheduling and traffic systems. This is achieved by using our universal tab-delimited and comma separated values (CSV) and flat fixed-width text import engine.

Excellent price/performance ratio

ListBox Neo does not require expensive hardware or ultra-fast workstations, thus avoiding unnecessary expenses. All content previewing and editing is done by the software itself.

Straightforward, user-friendly interface

No need to learn from scratch. ListBox Neo user interface looks quite familiar as a standard Windows software. Most users start instantly working with it even without reading the User's Manual.

Playback Preview

Currently edited playlist can be played back on PC monitor for preview purposes.
